Asset Tokenization Executive Training

In the era of digital finance, **Asset Tokenization** is redefining ownership, liquidity, and investment across the globe. From real estate and commodities to fine art and intellectual property, the ability to represent real-world assets on the blockchain opens new frontiers for innovation, transparency, and capital efficiency. This executive training is designed for forward-thinking professionals—executives, regulators, investment bankers, fintech leaders, and policymakers—who are ready to drive value through tokenized economies.

About the Program

The **Asset Tokenization Executive Training** is an immersive, 3-day program that equips participants with deep insights into the tokenization landscape, regulatory frameworks, implementation strategies, and real-world case studies. You'll walk away with the knowledge and confidence to lead tokenization initiatives and transform traditional asset models.

What You'll Learn

Day 1 – Foundations of Asset Tokenization

- Introduction to Asset Tokenization
- Digital Assets: Token types and functions
- Blockchain's role in tokenization
- Benefits and challenges
- Use cases across sectors
- Web 1.0 to Web 3.0 – The African opportunity

Day 2/3 – Tokenization for Investment Banking & Finance

- Deep dive into Real-World Asset Tokenization
- Drivers behind tokenizing real-world assets
- Tokenizable asset classes
- The tokenization process (step-by-step)
- Stakeholders and the ecosystem
- Value for investment banks
- Capital markets vs. tokenized platforms

Day 3/5 – Implementation, Regulation & the Future

- Regulatory and compliance overview (Nigeria & Global)
- Real-world case studies
- Key challenges and mitigation strategies
- Steps to building tokenization projects
- Generational wealth shift insights (Gen Z, Millennials, Gen Alpha)
- Trends shaping the future of tokenized assets
